Canada To The Fore

The breaking of records by Canada is becoming a commonplace. It is indeed an off year when, in some branch of human activity and endeavor, this young Dominion does not attract world attention to itself by some new and startling achievement.

Prior to the war, Canada was hardly known, even as a name, to the vast majority of the peoples of Europe, and those who recognized the name had but slight knowledge of the country. To most of the world, Canada was one of the colonies which Britain had scattered here and there over the face of the globe, but which was of little value and of still less importance in world affairs.

In the war Canada made a name for itself, and other nations were suddenly made to realize that there had arisen in the western hemisphere a nation which was not only to be reckoned with in all the markets of the world, but also a nation with a character and a destiny to have a profound effect upon international relations, political and economic. Canada's war effort served, perhaps as nothing of a less spectacular nature could have done, to turn the attention of the people of the United States northward, and awaken them to the fact that the whole of North America was not to be found within the confines of the republic; that, on the contrary, a second American power was rapidly developing.

Since the war the reality of this fact has year by year been emphasized. Long the world's greatest exporter of wheat, the United States has seen Canada pass it and secure that title by a wide margin. Within the past year or two, the United States has been forced to relinquish to Canada the distinction of being the world's largest manufacturer of paper. Steadily year by year, Canada has been passing other countries in the production of gold and is now within measurable distance of overtaking the United States and assuming second place to South Africa.

Contributing a volume of only minor importance to the total trade and commerce of the world a bare generation ago, Canada is now one of the world's greatest trading nations, and is to be reckoned with in all the markets of the world. Before the war, dependent upon the money markets of Great Britain and the United States to finance its many undertakings, Canadians today are able not only to finance their own country, but to an ever increasing extent are financing huge undertakings in other countries.

The war, and Canada's significant participation therein, also had the effect of raising the international status of the Dominion, giving it not only a status of equality with Great Britain within the Empire, but the rank of a nation in the council of nations. The refusal of the United States to join the League of Nations undoubtedly had the effect of the more directly focusing attention upon the North American nation which did join, and placing Canada in the forefront in the League membership.

And since destiny has thrust upon Canada to play its part in the international arena, this Dominion assumed the responsibility with dignity and real effectiveness. Its place around the council board at Geneva has been no minor nor insignificant one. Rather, Canada has wielded an influence possibly out of proportion to its present population, but in keeping with the growing importance which other nations now attach to this Dominion.

Having thus moved out into the great international arena, Canada this year decided to be worthy representative in the Olympic, the great meeting place of the athletes of the world. Despite its small and widely scattered population, this young Dominion dared to try conclusions with the much more numerous representatives of other countries in the field of sport and athletic skill and endurance. And again Canada surprised the world, for the sons and daughters of the Dominion carried the flag of Canada to victory time and time again, winning many of the premier events. A Canadian school boy, Percy Williams, of Vancouver, achieved the double victory of winning the 100 metres and the 200 metre race, regarded as classics of the great meet. Ethel Catherine, a Saskatchewan girl, won the high jump and in doing so established a new world's record. A quartette of Toronto girls also broke the world's record in winning the 400 metres relay race.

Considering the number of events in which the Canadians participated, no other country in the world approached their record. Canada's future is assured when it can produce virile and courageous young men and women of the stamp of its representatives in the Olympic games, and in the hands of such youth its position as a great agricultural, mining and manufacturing country, as a leader in world finance, and as an arbiter in international relations, is assured. Canada is coming into that proud position which Nature through her bountiful endowments intended it should occupy; and if the Canadian people continue to regard each new achievement as an incentive to still greater effort and enterprise, another generation will see their Dominion occupying a world position second to none.

National Radio Chain

Broadcasting Companies To Improve Quality Of Radio Programs

A national chain broadcast organization, divided into two sections, will commence operation on September 1. It was announced in Toronto, by R. W. Ashcroft, who has been appointed manager of the newly formed Trans-Canada Broadcast Company.

Mr. Ashcroft said the organization of the company was the outcome of a suggestion by F. J. A. Gardin, minister of marine and fisheries, that an effort be made by Canadian broadcasting companies to improve the

quality of domestic radio programs. Key stations of the new organization will be located in Winnipeg and Toronto.

Stations in Montreal, Ottawa, Kingston, Hamilton, London and Quebec, will be linked up with the eastern section and stations in Saskatoon, Regina, Edmonton, Lethbridge and Vancouver with the western section.

Russia and Peace Pact

Foreign Minister Of Soviet Republic Refuses To Fulfill U.S. To Invite Russia To Sign

George Tchitcherine, foreign minister of the Soviet Republic, issued a lengthy statement to the newspapers hinting at the necessity of the Soviet being one of the original participants in Secretary of State Kellogg's anti-war treaty.

Tchitcherine said the United States' failure to invite the Soviet to sign had been a mistake. "A desire to make the pact an instrument of isolation and struggle against the Soviet," the statement asserted that the pact was inseparable of preventing wars "because it does not provide for obligatory disarmament."

Charity covers a multitude of sins that should be allowed to remain uncovered.

Will Need Trained Voices

Talking Movies Will Have To Be Pleasing To Audience

The "talking movie" is just now being much talked about. Producers think it will greatly increase attendance on the pictures. That may be so. But it won't unless movie actors and actresses learn to speak as well as to "register emotion."

A voice has as much personality as a face, perhaps more. As long as it is not allowed to interfere with the face, all goes well; but when the face on the screen is fascinating, and the voice unarticulated and feeble, the contrast makes the audience either uncomfortable or amused. Neither state of mind is good for the box office.

Imperial Oil Development

Spending Million Dollars In Improvements To Begin Plant

When two new storage tanks to be built by the Imperial Oil Company for the plant at Regina are completed, the company will have spent something very close to \$1,000,000 in improvements within 12 months.

Last year the company spent \$700,000 in plant equipment. This year a road oil making plant has just been completed at a cost of \$500,000. The two new storage tanks, both of them 120 feet wide, every way by 42 feet high, will cost something like \$150,000.

GIRLS AND WOMEN NEED RICH BLOOD

This Lady Found Dr. Williams' Pink Pills A Friend Indeed

Just because she is a woman there are times when every woman needs help and strength in the form of a blood-building tonic.

To thousands of girls and women Dr. Williams' Pink Pills have proved a blessing because they can help them to get rich blood, give strength and restore tone to the system. The health of the girl who is languid and pale; the wife whose health falls as she reaches middle age; for all such sufferers Dr. Williams' Pink Pills are invaluable because they build up the blood and give strength to the system.

These pills have proved a blessing to thousands of others, who not only at various stages of life Mrs. G. R. Lake, Walton, N.Y., has proved the value of Dr. Williams' Pink Pills. She says: "I first used these pills when I was a young girl, for it is during the 'teen' years when nature calls upon every bit of the reserve strength we have, that we need their rejuvenating help. It was then I found Dr. Williams' Pink Pills a friend indeed. And again, now that the girlish stage is past and I am a mother of four children, subject to all the cares and worries of the home, Dr. Williams' Pink Pills are the only tonic I take to keep up my health and strength, and they have never failed. Should any ailing girl or weary mother, due to my advice try these pills. I know they will find them as equally good as I have done."

You can get these pills from any medicine dealer or by mail—ask for a box from Dr. Williams' Medicine Co., Brockville, Ont.

Saskatchewan Wheat Pool
The Saskatchewan Wheat Pool report an increase in acreage sown for the new five year contract for 1928-1933. They report 85 per cent of the old contract holders signed to date, also a large number of new contracts.

A Remedy For Earache—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it works for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

First Maid: Your fiancée stutters quite a bit, doesn't he?
Second Maid: Yes, but it doesn't matter. After we are married he won't have a thing to say, anyway.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Saria, Ont.—"I am willing to answer letters from other women who tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefit I received during the 'middle' of life. I do housework and my troubles made me unable to work. A friend advised me to try the Vegetable Compound. I felt great relief as my nerves began to settle, and my stomach began to work. I feel much better. I will recommend my friends to all with troubles like I had."—Mrs. John H. Saria, 162 N. Christina St., Saria, Ontario.

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Headaches, migraines, and all the aches and pains of the body, and approve its free use, for it does not irritate the stomach. Every drugist has it, but don't fail to ask the drugist for Bayer. And don't take any but the tablets that are stamped with the "Bayer Cross."

Growing More Potatoes

Greater Acreage Was Planted To Tubers In Canada This Year

Two per cent. more acreage was planted to potatoes in Canada this year than last year, according to the Dominion Department of Agriculture. All provinces report a slight increase in acreage with the exception of Saskatchewan and British Columbia. Conditions of crop are favorable throughout the Dominion, according to reports.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and thus the suffering of the wormed child.

Flown On Reckless Flying

Man Placed On U.S. Army Airplane Doing Daredevil Stunts At Exhibitions

A ban was placed today on United States aviators participating in exhibitions of dare devil stunts, such as wing walking and performances of a similar nature.

"This does not, of course, apply to legitimate flying acrobatics at proper altitudes," explained Army Air Secretary Davidson, "but merely to exhibitions such as trapeze work, wing walking, changing from one plane to another in the air, transferring from automobile to airplane and stunts of that character."

Sweet and palatable, Mother Gray's Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Deny Responsibility

Reject Charge That Catholic Clergy Responsible For Murder Of Oregon

Bishop Miguel De La Mora, in behalf of the episcopal sub-committee, has issued a statement rejecting the charge that the clergy was responsible for the murder of presidential-elect Oregon.

He declared the fact that one Catholic priest and one nun were involved in the crime did not mean that the clergy as a body was responsible. The statement asserted that it was publicly known that the Mother Superior, Conception Abbey, De La Mora was mentally deranged and that several cases of insanity have been reported in her territory. The superior, Conception Abbey, De La Mora, the slayer, was named by Jose De Leon Torral, the slayer, as having inspired him.

Secure Grazing Lease

A lease for grazing purposes of 21,807 acres of land northwest of the South Saskatchewan river, has been granted the Home Ranch Company, Ltd., of Bow Island, Alta.

Greyhounds are perhaps the oldest kind of pet of dog. Stone carvings dating back to about 400 B.C. show figures of these graceful animals.

It's more than a problem in geometry to square the circle in a dog's head.

When a small boy isn't doing anything else he eats something.

Minnard's Liniment For Blistered Feet.

A FRIEND OF THE PRESS

F. E. TRAUTMAN
Representative, Canadian Pacific Railway

Newspaper editors and proprietors from the Great Lakes to the Pacific Coast, comprise quite a large fraternity, and to know each and every one individually means a fairly large acquaintance.

Mr. F. E. Trautman, C.P.R. Press Representative, will position tell you that he has more than a nodding acquaintance with all the old-timers and most of the men who have more recently entered the newspaper field in Western Canada. Quite a few years have passed since Mr. Trautman quit the editorial chair of the Fort William Times-Journal, to enter the service of the Canadian Pacific Railway in his present capacity. During the intervening time he has cultivated and held the friendship of the newspaper men throughout Western Canada in particular and Eastern Canada as well. Mr. Trautman's outstanding characteristic is his gentleness, and the whole-souled interest he has taken in the welfare of the press is proverbial.

He has been ever present at annual gatherings of the Manitoba, Saskatchewan and Alberta weekly newspaper associations, and has contributed in his own way, and in a large measure to the success of these conventions.

Value of the production of the fisheries of Canada for the year 1927, was \$40,460,600.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should be made of the famous Dr. J. C. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

Hope is one of the greatest things in life. And if a little work is added to it the result is achievement.

Minnard's Liniment—a reliable first aid.

The value of the production of the fisheries of Canada for the year 1927, was \$40,460,600.

Lasting!

It takes skill to build things to endure. Anyone can build a battery—but only Eveready can make a Hot-Shot!

30 years of experience have taught Eveready how to put the longest life into batteries for farm ignition. From the current-making materials to the waterproof steel case, every feature of these famous power plants is rigidly tested by highly trained chemists, engineers and battery builders.

Each battery bearing the name Eveready bears a full guarantee of satisfaction. Remember, if it's not an Eveready, it's not a Hot-Shot.

Wayne Coal Miners In Drumheller Area Go Out On Strike

Drumheller, Alta.—The miners of Wayne have carried out their instructions, and the suspension of work at all the Wayne mines is now in effect. The men squared up the places Saturday, carried out the tools of their trade and walked out as a protest against the proposal to install the 11½ inch screen in the mines and the failure of the operators to recognize one particular union.

The miners still stand by the claims which have been published in the press, and claim that the men are 100 per cent. solid behind the action taken at Friday's evening vote and the subsequent meeting, which called for suspension of work, and voiced absolute opposition to the recommendation of the conciliation board in which their representative concurred.

The operators, on the other hand, claim they are going to install ahead screens at their mines, and that when screens are installed mines will begin to operate as usual. They also claim that the miners asked for a conciliation board and now they are not willing to abide by the board. The operators claim they are ready to carry out the recommendations of the conciliation board. This board recommends a union of all mines, with a special board made up of representatives from each mine to settle disputes which could not be settled between any one mine and their men.

Visits Constancy

Premier King Is Glad To Meet Supporters At Prince Albert

Prince Albert, Sask.—After an absence of two years, Rt. Hon. W. L. Mackenzie King arrived at the city which returned him to parliament as its member.

When the Premier stepped from his private car he was officially welcomed by Mayor Branson on behalf of the citizens.

Joining in the welcome were Dr. T. Robertson, president of the Prince Albert Federal Liberal Association; J. H. Lindsay, K.C., president of the Provincial Association; J. Flynn, president of the Young Liberals, and many prominent in the political life of the city and constituency.

An early complimentary lunch was tendered the Premier, following which the party left for Blaine Lake and Shellbrook. They returned in the evening and while tired the Premier stated that he had spent a very enjoyable day felt very happy in reviewing many old associations.

May Defers Old Age Pensions

Toronto, Ont.—Old age pensions may be deferred in Ontario for another year. Indications are that the survey ordered by Premier Ferguson will not be completed for the next session of the legislature, and so the bill may come up on the eve of the next election.

Buyers New Plane

Dessau, Germany.—Charles A. Levine, first trans-Atlantic aeroplane passenger, has purchased a junkers plane of the Bremen type for 100,000 marks (about \$23,550) for delivery here next week.

Railways Making Great Preparations To Handle The Crop

Montreal.—Canadian railroads are completing plans for moving the 41,600 harvesters called from Eastern Canada to help harvest the expected record wheat crop in the West.

The Canadian Pacific started its first excursion from the Quebec coast on August 11, and one from New Brunswick, August 10. The fare from stations in Ontario and Quebec is to be \$15, and from points in New Brunswick, St. John and west, \$20 to Winnipeg, plus half a cent a mile beyond all points in Manitoba, Saskatchewan and Alberta, and including Edmonton, Calgary and Macleod.

The harvesters are all destined to Winnipeg, whence special arrangements have been made for their speedy distribution to points in the West where they are most needed. Return fares are at \$20 from Winnipeg to points in Ontario and

Rich Gold Strike

Gold and Platinum Found In North

Edmonton, Alberta.—Said to be incredibly rich in gold and platinum, a "strike" has been made along the north shore of Lake Athabasca, to the east of Black Bay, in the province of Saskatchewan, according to a statement made by Ed. Meyers, Fort Chipewyan trader, who is now in the city.

Jack Hersey, well-known northman, made the strike, following prospect search for many years along the north shore of the lake, which has long been rumored to be rich in gold-bearing quartz.

Tests made at the University here disclose that some of the ore carries a content of precious minerals as high as 84 per cent., although this has not yet been confirmed.

According to another northerner, Charles L'Amour, who makes one of the syndicates which is outfitting to head for the scene of the new find, one of the assays gave average results of \$400 to the ton of some of the quartz shipped south from the scene of the find.

Storm-Swept Florida

Hurricane Creators Have Over a Wide Territory

Jacksonville, Fla.—After hammering at communities in the sparsely settled sections of East Central Florida, the tropical storm emerged to sweep Winter Haven and other towns in the rich central citrus country.

City officials at Winter Haven, approximately 50 miles east of Tampa, related that winds of 75 miles an hour, with gusts of 100, followed earlier gusts of 10-mile speed.

Grave fears are felt for the great citrus orchards, laden with fruit, in the immediate path of the storm. Meanwhile reports trickling in from the country between the new storm front and the Atlantic told of half a dozen towns and communities visited by damage from the storm.

English School Girls Arrive

Will Make Educational Tour Of Canada From Coast To Coast

Montreal.—Twenty-five English school girls have arrived in Canada to begin a two months' trip arranged under the auspices of the Imperial Daughters of the Empire.

The tour, which takes them to the maritime provinces, to Northern Ontario and Central Canada, the Rockies and the West, has been planned to give the girls a taste of the many phases of Canadian life. The party will return home on October 11.

Hickman Sentenced

Los Angeles.—William E. Hickman was sentenced to be hanged at San Quentin penitentiary on October 10, for the slaying of Marjorie Parker. Judge Douglas Edmonds overruled nine defence objections before setting the second hanging date for the youthful kid-napper who slew the 12-year-old school girl here last December.

Has Rank Of Colonel

Dublin.—Major James Fitzmaurice, member of the crew of the trans-Atlantic plane, "Bremon," sent promoted to the rank of colonel in the Free State Air Service.

Quebec, and \$25 to New Brunswick, plus the half-cent-a-mile-rate to Winnipeg from points in the West.

The Canadian National will run its harvesters excursions from August 9 to August 31. Special provision will be made for the care of families travelling on harvesters excursions over the Canadian National System.

Preparations are practically completed by the railroads for movement of the new harvesters. The Canadian Pacific has set aside more than 40,000 box cars for the movement, a much greater number than in any previous year. Seventy-nine engines have been loaned by Eastern lines, 13 of these new locomotives equipped with superheaters and feed water attachments.

Bins are clearing rapidly at the docks of the Lakes. Grain carriers along the Lakes are moving east at an average of 1,240,000 bushels a day.

COMES TO AMERICA

Hon. Mrs. Lord Guinness, one of the most beautiful of English aristocrats, is to take up residence in Pittsburgh, Pa., with her husband, Mr. Guinness was born in 1891, the daughter of Lord and Lady Churston.

British Harvest Help

Satisfactory Arrangements Completed With The British Government

Ottawa.—Satisfactory arrangements have been completed with the British Government for the movement of harvest help from the British Isles to the wheat fields of Western Canada, according to a statement issued by the department of immigration and colonization.

This agreement, which will begin at once, will be under the direction of the British Government, the Canadian National Railways and the Canadian Pacific Railway.

The two railways will be responsible for placing the men in harvest employment on their arrival from the Old Country and the Dominion Government and the Provincial governments will co-operate with the railways in placing these harvesters in winter farm employment in Canada after the rush of the harvest work is over.

Satisfactory arrangements have been made for the return fare for those harvesters for whom winter farm employment cannot be found.

Co-Operative Movement

Wholesale Society Expects To Establish 200 Stores In Saskatchewan

Saskatoon, Sask.—Referring to the recent announcement of the formation of the Saskatchewan Wholesale Society, which is being sponsored by the United Farmers of Canada to sell goods to consumers at as near cost as possible, W. Moss Thrasher, secretary, said that about 200 stores would be established within the first year.

Preference will be given to districts known to be favorable towards co-operative effort. Within a short period he hopes to see between 700 and 800 trading units founded so that the province will be fairly well covered.

Noble Submits Report

Rome.—Premier Mussolini has received General Umberto Nobile, who presented to him his first report of the Italia disaster. The Italian premier, sometime ago informed the cabinet that a complete investigation would be made into all phases of the loss of the North Pole dirigible.

Has Rank Of Colonel

Dublin.—Major James Fitzmaurice, member of the crew of the trans-Atlantic plane, "Bremon," sent promoted to the rank of colonel in the Free State Air Service.

Air Express Inaugurated

Before the propeller starts whirling the Canadian Pacific Express truck is on its way to the city parcels for delivery. A new air route gives bi-weekly express service in each direction between Toronto, Ottawa, Montreal and the stations of Rimouski, Quebec, and St. John's. Regular express schedules, western consignments being transferred to the Vancouver Express at Toronto.

French Plane Crashes

Maurice Drouhin, Noted French Aviator, Is Fatally Injured

Orly, France.—Another attempt to fly from Paris to New York ended in disaster before it had even begun.

The giant tri-motored "Rainbow" crashed on the landing field at Orly aerodrome, killing the mechanic, Lambert, fatally injuring the pilot, Maurice Drouhin, noted French flyer, and injuring two others, Gnanelli and Mennel.

The big plane, designed by Rene Couinnet and built entirely of wood, so constructed that all of its essential machinery would be accessible during flight, was a complete wreck, parts of the wings, fuselage and wires being strewn for 1,600 yards along the field.

"The Rainbow" was being put through its final test preparatory to a start across the Atlantic this week when the accident occurred.

It was racing close to the ground at about 125 miles an hour when a few spectators noticed a huge wing wobbling. The engine was cut off, then, but the deformation of the wing caused the giant "plane" to shoot almost perpendicularly into the air to a height of about 450 feet. There it slid to one side, apparently refusing to respond to the controls.

As it reached the ground it tore through a strong wire fence, knocked over iron posts, and crashed against the corner of a hangar, coming to a stop a crumbling wreck on the road bordering the field.

Italian Submarine Disaster

Twenty-Seven Of Crew Perish In The Tragedy

Rome.—Poisoned by acid fumes from the first rush of water, the crew of the Italian submarine P-14, sunk in a collision in the upper Adriatic, died to a man at their posts apparently with fortitude and resignation.

The stricken submarine was raised to the surface after 34 hours of desperate labor by divers who worked hour after hour to attach an air-pipe to the stricken vessel, and to fasten steel cables in order that she might be lifted to the surface.

Twenty-seven perished in the tragedy. First reported aboard by the naval authorities indicated that there were 31 men aboard, but a check of the bodies told revealed that four of the crew had remained ashore for reasons which have not yet been ascertained. Included in the victims were two officers, Captain Weil and Commander Fasulo.

Captain Weil and Commander Fasulo were both at their posts of command in the conning-tower while the remaining members of the crew were all found dead at their stations. There were no visible signs of panic aboard the boat.

Dies From Wounds

Stefan Raditch, Croatian Leader, Succumbs To Injuries

Vienna.—Stefan Raditch, Croatian peasant parliamentary leader, died recently at Zagreb, capital of Croatia. The city was grief-stricken for the hero who was everywhere ready to suppress trouble.

Raditch died of wounds received last June 20, in parliament, when a radical deputy, Puncic Reticich, infuriated at frequent interruptions, whipped out his pistol and fired six shots into a group of Croats.

Each shot claimed a victim, two being killed, one of them a nephew of Raditch, and four wounded.

For a time Stefan Raditch's condition improved but he suffered a relapse which finally brought about his death.

Since his assassination Croatia has been in a condition almost of martial law, with troops patrolling its cities and streets to quell possible popular demonstrations occasioned as a result of the episode.

Ontario Government Makes Seizure Of Liquor From Export Houses

Ontario Wheat Pool

Meets With Good Success After One Year's Operation

Chatham, Ont.—In a year of operation the Ontario Grain Pool has proven an outstanding success, and, according to present indications, greater things will be achieved in the next year. The farmers have been educated to realize the benefits of co-operative marketing, and they are getting solidly behind the pool movement in Ontario. These facts were brought out at a meeting here, when the pool's affairs, past and present, were discussed.

The speakers were Colin H. Busby, president of the Manitoba Wheat Pool, and H. A. Gill, president of the Ontario Co-operative Company. David L. McCrea, Walsburg, Kent County representative on the Ontario pool directorate, acted as chairman, and at the close of the morning meeting was unanimously re-elected to the governing board of the pool.

Mr. Busby told of the remarkable progress made by the pool movement in Ontario in a year, during which time hundreds of five-year contracts had been signed. He was assured by observation throughout the grain-growing areas that the growers were becoming convinced of the necessity of co-operative marketing and would join the pool in greater numbers during the next twelve months.

Pilgrims At Ypres

Impressive Ceremony Is Held In Which 11,600 British Veterans Participated

Ypres, Belgium.—Eleven thousand British veterans of the Great War, including 3,000 women who served in various capacities during those four terrible years, gathered about Menin Gate on Aug. 8th for a solemn ceremony in commemoration of their comrades who fell in the desperately held Ypres salient.

Among them stood the Prince of Wales, Lady Haig, the widow of Britain's victorious commander, Admiral Jellicoe, president of the British Legion, who headed Britain's naval forces in the great struggle, and other commanders who bore a share in the battle of Ypres.

The pilgrims had come, some marching along the familiar roads and others by train, their numbers swelled by thousands who had gathered to witness the ceremony until it was estimated that nearly 20,000 men, women and children joined in singing the opening hymn, "O Valiant Hearts."

The service, in which the huge congregation participated, was beautifully simple and supremely impressive.

Prince George Coming

Will Pass Through Canada To Join Ship At Vancouver

London, Eng.—Prince George, youngest son of the King, is leaving London at once to join H.M.S. Durban, in the West Indies station, to which he was recently appointed as interpreter in French.

He will travel to Canada aboard the Empress of Australia, and will join his ship at Vancouver, B.C., to ward the end of the month.

Can See No Sign Of Decadence In The British Empire

London, Eng.—"I am going back better pleased than ever that I am a British citizen," declared Premier G. Howard Ferguson, of Ontario, to the Canadian Press, before his departure for Canada.

Premier Ferguson has been in Britain and Europe studying migration possibilities, educational systems and agriculture since great in June.

"The man is a fool who says that the old country is decadent," Premier Ferguson said. "The present day is like every other country in the world, England lost a generation of the brightest and most promising men and women. The thrust of business or public life. The still younger group who were then be-

Windsor, Ont.—Placing every liquor export dock from Belle River to Kingsville and seizing their wet stocks aggregating several millions of dollars in value under police guard, the Ontario liquor control board, every exporter on the border with unlawful possession of liquor and ordered them to appear in court to answer the charges.

Firing broadsides of subpoenas along the entire liquor front, provincial police squads, under the command of Inspector F. E. Elliott, of Toronto, served legal notice on 36 exporters of the attack on them by the Ontario liquor control board, the body through which the attorney-general's department is moving. Conviction of a fine of \$100 to \$1,000 for each of the exporters or a jail sentence. Magistrates and judges may order jail terms in lieu of fines. The Ontario liquor control board's stocks of liquors are also automatically confiscated to the government in the event of conviction.

Provincial police are checking their lists of 28 liquor export docks along the Detroit River, the operators of which were being served today with summonses to face liquor control act charges in police court presumably based on evidence found by liquor control board auditors in their check-up of exporters' books during the past month.

Conviction of what had actually been discovered, however, was given and it appeared probable that this would not be revealed until in cases caught on trial.

It was not expected that exporting to the dry United States would be effected inasmuch as the present arrangement whereby liquor is loaded from freight cars to rum-runners boats without material delay.

New Telephone Service

All-Canadian Phone Service Between Winnipeg and East Is Inaugurated

Winnipeg, Man.—The inauguration of the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Port Arthur and Port William, Ontario, of the Bell Telephone Company, the Canadian Pacific Railway and the Manitoba Government, recently spoke to one another across 1,600 miles of copper wire.

The new line between Winnipeg and Montreal is approximately 1,600 miles, and is erected on Canadian Pacific telegraph pole line from Manitoba to Sudbury, via Port Arthur and Port William; from Sudbury it continues to all eastern points by the Bell Telephone Company's lines. The weight of copper of the new line amounts to 300 tons.

The service, in which the huge congregation participated, was beautifully simple and supremely impressive.

Respect For Flag

Kingsford, Ont.—Ontario branch Canadian Legion, in convention here, commended the use of the Union Jack to drape desks at meetings, etc., and would have it used only as a flag.

Can See No Sign

Of Decadence In The British Empire

low military age are now coming on. The next ten years ought to be the most stirring in the whole history of British development.

The premier said he found conditions in Scotland and Ireland greatly improved since he was in June.

"I can see a distinct advance everywhere in interest in overseas," Premier Ferguson said. "The present day is like every other country in the world, England lost a generation of the brightest and most promising men and women. The thrust of business or public life. The still younger group who were then be-

Fur Farming Very Soon To Be A Recognized and Established Western Canadian Industry

Authorities make the prediction that within the next quarter of a century fur farming will be a stabilized industry in Western Canada, accepted and recognized as one of the many phases of agriculture in that territory instead of as a somewhat novel, extraneous activity. The trend in that direction is unmistakable. Farming settlement is extending northward, and with scientific development having added considerably to the dominion of the plow, the tendency to raise furs intensively and domestically will inevitably become more accentuated, and fur farming takes its place alongside the other established activities of that territory. And because this area is by reason of its climate and soil conditions capable of producing superior peltry it need fear no rivalry from other countries in the pursuit is similarly developing.

Many branches of fur farming have become soundly established in Western Canada to the extent they have got past the stage of foundation, and are exporting live animals abroad. One of the branches which has received relatively little attention, but which is promised a meteoric development, is that of muskrat and beaver farming, particularly the former. From a position of virtual insignificance in the fur trade this little animal has attained a place of outstanding importance by reason of his peltry's multiplicity of uses. The security of the future of the muskrat industry is held to be the readiness with which the pelts of this little animal can be adapted to imitate the rare and costly mink pelts. His position is secure as far as can be seen into the future. And while this industry is established in other parts of the Dominion it promises to be one which Western Canada is going to make peculiarly its own.

According to all reports a veritable army of men in the Prairie provinces has been awaiting the completion of arrangements for the transfer of the muskrats and other suitable pelts from the Federal Government to the provinces. There are stated to be 800 applicants waiting in line for hundreds in Saskatchewan and Manitoba. According to announcement these lands are to be leased for fur farming purposes at 25 cents per acre for three years and \$1 per acre for each successive year. There is every indication of wholesale establishment to take place as soon as filing is open.

British Columbia is not lagging behind her prairie sisters, having long since securely established this industry, which is thriving in several suitable sections, and in which it is to be found the world's largest establishment of this nature. The Columbia-Kootenay Valley has come particularly to the fore in this region, and many individuals from adjoining States of the Union have in the past few years moved up to the pursuit there. A further addition to such ranches was recently made when a group of Kootenay business men secured a large holding of fur farm land from the Columbia Valley Ranches Limited, on the Kootenay Central Branch of the Canadian Pacific Railway, for the purpose of entering upon beaver and muskrat ranching on a large scale. This follows upon three similar fur-farming enterprises to establish in this section.

The industry is one which appeals from many points of view. The land so utilized is largely waste, and unproductive. Operation is economical and to achieve success does not necessitate any great experience or amount of technical knowledge. The

increasing demand for muskrat has elevated prices considerably. There are now fairly stabilized, in the opinion of authorities, who are confident of the industry's ability to produce in the future. The average value of all muskrat sold in Canada at the time of the Government's last report was \$1.54, while at recent Montreal sales as high as \$2.70 per pelt has been secured. Ranch-bred pelts naturally bring higher prices, and since large-scale operation is the essence of the muskrat industry it is not difficult to realize the profit which can be made.

Muskrat farming is to become an additional source of revenue in Western Canada from its pursuit as a sole occupation or as a phase of mixed farming. The acquisition of furs in Western Canada has always proved profitable, and the Government's Experimental Farm at Ottawa is adding to the year's profits, and this continues even in long settled and established districts, since certain valued furs are found to increase with settlement. A new industry conferring a double benefit came into being with the muskrat, and it was found that going to newly discovered tanning processes the rabbit, which exists there in thousands, could be profitably disposed of. In the past winter one Winnipeg firm alone handled more than 100,000 with a small skin, paying for them an average of 10 cents apiece. Furs taken in Western Canada today have an annual value of \$10,000,000, and the attention being paid to fur farming should have the effect of augmenting this figure.

Canadian Hospitality

New Resident From Old Land Pays Tribute To Kindness Of Canadian People

When he was in the city as a guest of the countess the other day, Mr. J. W. Chaudes, deputy town clerk at Barrow-Furness, England, said: "It is my first visit to Canada, and I assure you my impressions have been very good, especially with respect to the sociability and kindness of the Canadian people."

In an Old Country newspaper there appeared recently a letter from Mr. H. H. Hodgson, who came from England, now a farmer near Manville, Alberta, who said in this part: "We have done fairly well in this part; it was our first crop. We had thirty-five acres of wheat in, and we got 1,070 bushels off it, so it is well done as well this year as we are not afraid of getting on. We were well done by the Canadians when we got here. When we arrived at Manville it was four o'clock in the morning and we were met by four gentlemen who took us to a big hall. It was lovely and we were very comfortable. We had a box of provisions for us, and we stayed in this hall until the next day, for our baggage did not arrive until then. We were then taken to our new home, nine miles out of Manville. We had a new house and new barn for our cattle, and the neighbors near us had the first one when we arrived. Everyone out there is so friendly."

Tristies to Canadian hospitality and friendliness, of course, are undisturbed by most people who visit the Dominion. It is refreshing to read them, moreover, if only to contrast them with the impressions of the Bishop of London, who recently said that he had failed to find an enthusiastic welcome for a Britisher in any part of the Empire. Victorian Times.

Park Animals Are Fearless
Wild life conservation measures adopted and enforced in the Yukon at Parks of Canada, have resulted in the wild creatures being much tamer than they are in most other sections. It is no uncommon occurrence to encounter wild deer on the streets of Banff town, in Rocky Mountain Park, Alberta, while Rocky Mountain elk are met alongside certain sections of the park highways, undisturbed by the passing motor traffic.

Track Zebra "So your boy produced a new globe-making college, eh? I suppose he's doing the painting and raising now."

Track Zebra: "Yep, he's planted his feet on the table and is raising a mousetrap."

All the world seems to be longing for peace. In fact, some nations are ready to fight it.

Some men look for happiness with a lantern when the sun is shining.

"He has an illness, the doctor does not understand. He can eat and drink as well as ever, but he cannot work. I don't call that a success does it, a gift from Heaven."—Sennedism—Strix, Stucholm.

Herman Trelle Scores Again

Wins More Honors At Grain Show Held At Regina

Herman Trelle, of Wembley, Peace River District, Alberta, who won the grand championship for both wheat and oats at the International Grain and Hay Show, in 1908, and the grand championship for oats and the reserve grand championship for wheat at the 1927 International Show recently won more high honors at the International Grain Show held in conjunction with the Regina Exhibition, in the non-competitive exhibit at the Regina show, Trelle had on display a sample of what at present is termed his "Mystery" wheat, a variety which he is developing and is believed to be a cross between a Marquis and a new variety known as Revard, which gives great promise not only for early maturing but for resisting both diseases of the Canadian Government Experimental Farm at Ottawa.

Herman Trelle is a native of Connecticut, Idaho, and came to Canada with his parents when a young boy. He is a graduate of the University of Alberta.

U.S. May Cut Tariff On Cattle

Hon. Vincent Massey Working In Interest Of Our Stock Raisers

Hon. Vincent Massey, Canadian Minister to Washington, has succeeded in inserting the thin end of the wedge which will open up discussion on the tariff with wool-farmers in Chicago before.

Their belief centres around the fact that the tariff on wool is too high, and the States Tariff Board is about to leave for western Canada to inquire into the cost of cattle production. It is stated that much research is already preliminary to serious consideration of tariff problems.

The theory of the tariff makers, it is pointed out, is that an import tariff must equal differences in cost of production between tariff levying and exporting countries.

Traders on the stock markets are of the opinion that the present tariff affords no protection to American cattle raisers and merely multiplies Canadian growers.

Taking Care Of Silo

Crescote Preparations Better Than Linseed Oil For Feeding Ponds

This is the season when staves also go down. The staves shrink in the heat, and at the same time the iron hoops lengthen. Up comes a wind and in goes the silo. There are two precautions to take. Tighten the hoops a little. These should be, although they often are not, so placed that they can easily be reached from the chute. And if there is time, paint the inside with linseed oil (half boiled, half raw) and the outside with ordinary paint. This seals the pores of the wood and prevents it from swelling and shrinking to such an extent. Crescote preparations are cheaper than the linseed oil, but may taint the silage.

Illustrated signs, showing where pedestrians may cross busy streets and motorists must give them right-of-way, are being considered by the Paris police.

The way prices are today says the Kitchener Record, about the only thing that a person has occasion to ask for change for a quarter is on Sunday morning.

AROUND THE WORLD IN RECORD TIME

John Henry Meers (left) and C. D. B. Colyer, with their mascot, arrived at a new globe-making college by circling the world in 25 days, 10 hours and 5 seconds. Five days less than the previous record.

Encourage Farm Study

Daughters Of Empire Will Give Bursaries To Quebec Students

To encourage the study of agriculture in the Province of Quebec, the Quebec provincial chapter of the Imperial Order Daughters of the Empire have decided to give two bursaries to students in agriculture, beginning with the academic year 1928-1929. Impartially towards the two races has marked the arrangement as one of the bursaries is set apart for MacDonald College, while the other goes to the agricultural college at St. Anne de la Prescote, which is entirely French. It has been stipulated that the bursaries, which are for \$200 each, shall be awarded the students taking the highest marks in the final examinations of the second year of the degree course in agriculture. In both colleges there are short courses, but the scholarships of the I.O.D.E. are intended primarily to help students who wish to make a thorough study of the profession.

The Daughters of the Empire had found that very little was being done in Quebec to encourage the study of farming in an up-to-date and scientific manner, it was stated. As their object was to encourage the study, it seemed thoroughly fitting, that the bursaries be given at the present time for agriculture, in order to show the interest of the Daughters of the Empire in all phases of their country's welfare.

Fall Ploughing Sod For Corn

Should Be Planned Soon As Possible After Removal Of Hay Crop

Sod land to be put into corn this year according to tests made at the Experimental Farm, Ottawa, should be ploughed as soon as possible after the hay crop has been removed. This is particularly recommended for weedy land, which should be worked frequently after the ploughing until late in October when it should again be ploughed and left rough over winter. According to the report of the Field Experiment Station, Ottawa, 1927, published by the Department of Agriculture, Ottawa, this practice not only increases the yield of the crop, but it lessens the work of weed eradication. While the second ploughing may in the case of light soil be left until spring when the weeds have been pretty well controlled, it is much better, under all conditions, to plough to this report, in the case of clay soil to do the second ploughing in the autumn.

Apple Crop Is Promising

Twelve Per Cent. Better Crop Forecasted For This Year

The Dominion's Department of Agriculture forecasts a 12 per cent. better commercial apple crop this year than last. The estimate is 3,157,360 barrels as compared with 2,810,600 last year, and an average of 3,105,580 for the five year period, 1922-27. The increase is in the main attributable to the British Columbia crop which is estimated at 1,483,200 barrels as compared with 1,079,500 barrels in 1927 and a five year average of 1,069,270 barrels.

Mrs. Mosher—"One thing, my husband and I never do any quarrelling at the breakfast table."

Mrs. Mosher—"That's right. I have seen your man eating his breakfast in your street."

The average time taken by blood to circulate from one arm to the other is 18 seconds. It makes the round trip three and a third time in a minute.

Greatest Ranching Areas On The North American Continent Are To Be Found In The West

Tobacco Expert For Canada

Canadian Government Paying Special Attention To This Growing Industry

Neil T. Nelson, B.S.A., has been appointed to the position of Chief of the Tobacco Division of the Canadian Government. Dr. Nelson has been tobacco expert for the past four years at Windsor, Connecticut, U.S.A. After graduating from the University of Wisconsin, he was appointed to the staff of that University and in 1919-20 worked on tobacco diseases under Dr. Johnson, a leading tobacco expert in the United States. From 1921 to 1923 Dr. Nelson was assistant and in agronomy at the university, and for the past four years has given special attention to tobacco fertilizing, curing, improvement of varieties, etc. The rapid increase in tobacco production in Canada, which has increased from 2,500,000 pounds in 1921 to approximately 46,000,000 pounds in 1927, is causing the Canadian Government to pay special attention to this growing industry.

British Boys Arrive

Party Of Young Men To Study Farming Methods In Prince Albert District

Eleven British boys and young men, part of a group of 100 immigrants from the old country, landed in Prince Albert recently, and were taken in charge by the land settlement board to be placed on farms in the district.

The settlement board will keep a record of each man for the next five years. They are all well equipped, and have completed a course of instruction in England at either the Brandon or Claydon farm colleges with a view to settlement on farms in Western Canada.

Winnipeg Newspaper Union

The region has long been established as one of the greatest ranching areas on the North American continent, but it does not represent more than a relatively moderate proportion of the available country. Other sections of the Canadian West offer equal opportunities for raising of live stock on an extensive scale. Much interest is being taken in the Peace River tract of Northern Alberta and the valleys of the interior of British Columbia. In the vast region of the Peace River are large tracts of good grazing land suitable for ranching, the bright prospect facing the industry at the present time, enabling many to that territory. Again, in the interior of the Pacific coast province are excellent stretches of range country, capable of carrying great herds of cattle and horses. The establishment of new enterprises and the importation of numerous animals are continually being reported, the bulletin announces.

Political economists in the United States are now beginning to realize the importance of Canada's food producing possibilities. Not only is the home population continually increasing, but the extension of its cultivated land is gradually contracting the vast open spaces once available for free stock ranges. The recent drain on Canada's beef and dairy cattle to replenish the depleted United States herds is more likely to increase than diminish, judging from the estimates of the situation appearing in newspapers south of the line. In the last fiscal year Canada exported 280,021 head of cattle, worth \$13,877,405, figures exceeded only in 1919, 1920 and 1921. A recent Canadian Pacific bulletin on ranching in Canada states that Canada's cattle have been moving steadily to the border as prices are returning to their producers the greatest profits ever received, and the prospect is that this movement will continue for some time. It goes on to point out that any possible surplus above United States requirements should have an outlet through the British Isles and, probably, Japan, the latter country having recently taken large shipments of Alberta cattle.

The bulletin has attracted attention in the United States, more particularly in the West, where the main line of the railway, in the provinces of Saskatchewan and Alberta, runs more than 5,000 miles of level, or less, range land where giant herds of horses, cattle and sheep roam the prairies pasturing on the rich grasses as they did in the area's earliest stage of development, and where by reason of conditions they will probably always continue to do so. Within the railway belt of British Columbia are over 6,000,000 acres of leases, the number of leases and the area comprised steadily increasing. A direct impetus to the ranching industry was recently given by the Department of the Interior in an amendment, which it allowed the granting of 21-year leases.

The region has long been established as one of the greatest ranching areas on the North American continent, but it does not represent more than a relatively moderate proportion of the available country. Other sections of the Canadian West offer equal opportunities for raising of live stock on an extensive scale. Would Reclaim Sahara Desert

Plan To Create Inland Sea In Northern Africa

A plan to change the climate of Northern Africa by creating inland seas in the Sahara Desert is being seriously considered by the French government and the cabinet is expected to make a decision on the question in September.

Dwight Braman, of New York, is the engineer who presented the plan and undertook to raise \$50,000,000 to further the project. He is an engineering student but last spring of the arid wastes lying below the level of the Mediterranean and extending from the Gulf of Gabes westward to Hiskra, and formulated plans to cut three ship canals forty feet deep and two hundred feet wide connecting the Mediterranean Sea at Gabes with three dry saline lake beds called "Schotts."

It is estimated that Mediterranean waters by means of these canals would permanently flood some 10,000 square miles reaching from Gabes westward. This would mean a water route of about 250 miles for seagoing ships through a part of Tunis and deep into Algeria.

The main purpose, however, is to affect climatic conditions and increase rainfall, which Braman undertakes to demonstrate, will be the result.

His scheme is based upon that of a commission of French engineers, chief of whom was M. de Lesseps, who in 1882 made a minute survey of the entire region.

Prosperous Toronto

Residents Pay More Income Tax Than Any Other City In Canada

Prosperity must have struck the City of Toronto in a great wave last year, for the Queen City paid nearly three millions more in income tax than in the previous year, the greatest increase of any city in the Dominion, not excepting even Montreal.

Toronto's contribution to the Dominion's treasury was \$13,448,545. Of the other principal cities in the Dominion, twelve showed an increased income tax and seven a decrease. Some of the increase is due to the efficiency of the department of national revenue, and includes some of the arrears cleaned up under threat of prosecution.

Toronto's income tax collection for 1928-29 was \$12,448,545, an advance of \$2,992,517 over the 1927-28 collections of \$10,456,028. Montreal's 1928-29 collection of \$11,684,083 was \$2,728,791 ahead of the 1927-28 figure of \$13,402,270.

Hard To Replace

Communities Should See That Old Industries Are Satisfied

It takes at least two new industries to replace in employing capacity one that has failed or moved elsewhere. Few new industries start on a large scale. The city that lets a long-established industry die for lack of help that could properly be given cannot ordinarily make up the economic loss at least in a short time, bringing in another industry that takes the place of a defunct one. It is an almost literal translation of the old adage about the birds, the hand and the bush.—New York Sun.

Jasper National Park

Jasper Park, which is situated on the Canadian National Railways in the northern part of Alberta, has a total area of 5,280 square miles. A great portion of this huge mountain wilderness is still unexplored. The entire region is rich in historic associations.

Ancient Chateau Demolished

Ruins Of Thousand Year Old Castle In France Are Removed

Neither governmental nor individual funds could be obtained recently to save one of the most interesting monuments in central France—the chateau of the Duke of Orleans, King of Navarre, in 1199 for Queen Blanche.

The ruins of the chateau, located at Pouébois in the Aube Department, consisted of a stone tower with arched windows and a series of fortifications. With this historical background they could have been transported to any country estate in Europe of the Americas at little expense. The windows and portals were in excellent condition, and there were several interesting inscriptions attesting the age of the edifice.

For several months the government waited for collectors to enter their bids for the premises, but none appeared on the scene. This caused considerable surprise as in the past the mere mention of a thousand-year-old building would have been sufficient to bring collectors and experts from all parts of the world. The French antiquarians made a final desperate attempt to save the ruins as a part of the nation's architectural patrimony, and the question was even discussed in the Chamber of Deputies.

Needing funds for other purposes, however, the Minister of Education and Fine Arts turned a deaf ear to all proposals and in the end refused to authorize the opening of a public subscription.

And now, at twilight, the walls and turret which had survived the hottest conflicts of the Hundred Years' War, stand sentinels to guard a tremendous charge of cheddle.

Nothing Pays Better

Education Is Greatest Asset To Success In Life

Does education pay? Surely, there is nothing which pays better. In these days of competition it is the one absolutely indispensable factor, without which success is practically impossible. In short, the more education one has, the more successful one is. In the eyes of the community as a whole, ignorance in one form or another is responsible for most of the woes of the world—the war against ignorance is the most important of all. Education is the mainstay of civilization. That country is the most civilized which gives its children the best education. Education is the foundation of all progress and intellectual faculties. When such development has been adequately provided for, there need be any worry about other things. The schools are the very foundation of society.

The Cost Of Progress

Three Four Thousand Years Old Race Cut Down To Build Bungalows

It is a giant race that California are being cut down ruthlessly by lumber companies. The irony of it is that among the redwoods we are finding the most beautiful of the old-time ruins—old to build bungalows, make railways and to split into grapestakes—chiefly grapestakes. Any fool can cut down a tree. But to cut down a tree and to build a bungalow is a task that can never be replaced. A second growth may spring from the stump; but humanity is too impatient and avaricious to wait 4,000 years again.—Los Angeles Times.

Vitamines For Growing Chicks

Cod Liver Oil Is Recommended For Leg Weakness

Leg weakness has been a common disease of young chicks, but investigations of recent years have taught poultrymen how to avoid this trouble. If growing chicks get an abundance of direct sunlight they are more liable to contract this disease, but if housed for four or more weeks they are invariably subject to the trouble which is caused by lack of vitamins. Cod liver oil is now used in many poultry flocks and its virtue is believed to be due to its richness in vitamins. A pamphlet on the "Artificial Breeding of Chicks," prepared by the Dominion District Poultry Promoter and the Provincial Poultry Superintendent for New Brunswick and distributed by the Director of Publicity of the Department of Agriculture, at Ottawa, recommends the use of cod liver oil in amounts of one to two cent per cent of the mash according to the degree of confinement. This, it is claimed, will prevent or cure advanced cases of leg weakness. Egg yolks, and canned tomatoes are claimed by the authors to have a value in preventing leg weakness.

Other feeds rich in vitamins are yellow corn, green feed, immature cut clover and alfalfa hay. These if used in an otherwise well balanced ration will give the flock the vitamins necessary for their well doing.

The plan recommends mixing the cod liver oil in the dry mash is the first mix the oil with bran until it is evenly saturated and then mix the mash with the other ingredients and the mash. As the vitamins quality diminishes when mixed with the feed only sufficient mash should be mixed at a time to do the flock for three or four days.

Are Sun's Rays Declining

Scientists Say That Old Sol May Quit Any Day

Jupiter, the largest planet of the sun, is about to be overtaken by volcanic bombs into space, says a French astronomer. Some of the comets and fire balls that sometimes hit the earth may come from Jupiter. Modern reflecting telescopes are capable of photographing three billion miles away, and carried on through life is the mainstay of civilization. That country is the most civilized which gives its children the best education. Education is the foundation of all progress and intellectual faculties. When such development has been adequately provided for, there need be any worry about other things. The schools are the very foundation of society.

Forest Fire Situation Improved

Season Of 1927 Was Unusually Favorable In Regard To Fires

Reports submitted by field officers of the Forest Service Department of the Interior, show the season of 1927 to have been unusually favorable in regard to forest fires. Six hundred and sixty-five fires occurred on Dominion lands in Alberta, Saskatchewan, and Manitoba, protected by the forest service during the season mentioned, as compared with 1,398 fires in 1926, 1,165 in 1925, and 1,487 fires in 1924. The area of most considerable timber burned over was 98,207 acres in 1927, as compared with 113,220 acres in 1926 (the worst fire season on record for many years), 129,970 acres in 1925, and 239,320 acres in 1924.

German Invents Film Paper

Paper films are the newest German invention. It is asserted they will revolutionize the picture industry. A Berlin engineer announces that after years of tests he has succeeded in manufacturing paper which is as supple as light as celluloid. It is not inflammable and is cheaper than celluloid film. The Scherwin studio says the invention is a complete success.

She: "There are two things that prevent you from being a good dancer."

He: "What are they?"

She: "Your feet."

Quilt From Bridal Costume

Interesting Memento Of 1823 Placed On View In Museum

Pragility and sentiment are joined in the story of a silk quilt made of squares of bridesmaids' dresses placed on view from the Brooklyn Museum as a loan from Mrs. Theresa Holbeck, Valley of Manhattan. It dates back to the Quaker wedding of Deborah Coggeshall, of New York and Edward Walter, of Philadelphia, 1823.

Bridal costumes in the 19th century were commonly regarded as made for a single wearing, disappearing from sight thereafter, in packings of linen and lavender. On this occasion the mother and aunts of the bride persuaded the owners to surrender the garments in order that they might be converted into a quilt which the bride might cherish as a memento. Their faith that it would receive her tender care is justified by its present neat, unbroken appearance.

The colors in the quilt include various shades of beige, or unbleached silk, several shades of greenish gray and a variety of light grays from white to oyster white shades. A vase of flowers is the central motif. Three quilted borders surround it. The quilt is a delicate and graceful, the next an arrangement of feather scales and the third is of leaves.

The museum story of the quilt says most careful planning and many days of work must have been given to design and make it, and the bride added through life as one of her most prized possessions.

Internal Parasites Of Swine

Sanitation Is Of Prime Importance In Dealing With This Pest

Unhitherto in pigs is often due to infestation of internal parasites. In the latest edition of the bulletin "Swine Husbandry in Canada," of the Department of Agriculture, Ottawa, an article has been introduced from the pen of Dr. Lionel Stevenson of the Ontario Agricultural College, who in an opening sentence says: "Why feed a worm-infested pig for ten or twelve months to get it up to market weight? Better wait it until it is free of worms, and then feed it, value, while bacon on the hoof has." Four parasites in particular are dealt with in his paper and clearly defined treatments are given for their control. Sanitation is of the utmost importance in internal parasite control. Clean sties if permitted to run in infested yards, pens and fields quickly become victims of parasites as well as distributors of parasite eggs. The extensive use of colony house and fresh ground for yards during the open season of the year is recommended for the keeping down of infestation.

The medicinal treatment recommended includes the use of such drugs as oil of turpentine, creosote, Santonin, Benzine, and Acrea nut. In doses that should be used for pigs of different ages.

A TITLED FARMER

Scion Of Noble Family Has Extensive Holdings In Alberta

Count De Topor, English economist and philanthropist, was among the cabin passengers sailing on the Cunarder, Acadia, for Europe recently. The count, who also possesses the title of Duke of Ostlin, is a cousin of the late Emperor Franz Josef, of Austria. His family has been prominent in Polish and Austrian history since the year 1810. One of the count's forebears being Count Maximilian, chancellor of Poland.

"I have no respect for titles," remarked the count, "but family matters make it essential that I should use mine. To my mind, the only thing of any account is the place in this world man creates by his own efforts."

Count De Topor has extensive interests in Canada, mainly through his efforts, the town of Vermilion, Alberta, has now extensive farm lands. He erected 40 houses there for farm workers and had a large plot of waste land turned into a nice park. Wooden sidewalks were replaced with concrete. Farm workers are happy, and they have lived rent free on his farms. They have made such splendid progress, he said, that some of them saved as much as \$100.00 in three years, and came to him waiting to buy property.

Count De Topor has extensive interests in the west and around Edmonton, which include nearly 60,000 acres of farm land. The count is a member in the Canadian west than anywhere else in the world," he remarked, "and the west holds a marvelous future for the small farmer who is not afraid of a little hard work."

Count De Topor said he avoided getting too close to the matter of agriculturalists into this country. He pointed out that his visit was private, though he was doing his best to further the claims of Canada as a promising agricultural nation of the world.

In addition to his philanthropic and economic interests, the count is a doctor and lawyer, though he does not practice.

"It is a long time to practice," he said, "but I am rushing home now to look after a sick friend who is lying in Le Poulin, Fimister, Brittany, after which I shall return to my home in East Grinstead, Sussex."

Can Be Exaggerated

Intelligence Not Always Due To Ability To Read and Write

In an article in the Prince of Wales, a writer in a London Sunday newspaper says: "You will not find him belittling his mind with books." I do not remember ever reading a sentence with more curious implications. . . . If books only belittled the mind, then it would be a pity to be better off if all the schools were shut and schoolmasters were given to writing and writing and writing to innocent children should be sent to prison as public dangers. . . . Still, we are inclined today to exaggerate the importance of reading and writing to the growth of the intellect. A considerable percentage of human beings would be just as intelligent as they are at present if they had never learned to read or write, and I have known men who could not read or write and who were nevertheless better company, more imaginative and more intelligent than others who could. Speech plays a far more important part in the life of the ordinary man than reading and writing. It is possible for a man who can neither read or write to be a good poet or a good farmer, and a world containing good poets and good farmers is a world in which we do us ought to be reasonably happy.

Always Trustworthy

Senior Partner: "One thing I like about our new clerk is that he is trustworthy. You can always tell what he is going to do next."

Junior Partner: "And what is that?"

Senior Partner: "Nothing."

Nearly 1,000,000 pounds of potatoes are produced annually by convicts of six Canadian prisons and of this amount nearly two-thirds are grown on prison lands of Saskatchewan and Manitoba.

Pointing to 16 residents living within 100 yards of one another, who have a combined age of 1300 years, Shanghai, in the Isle of Wight, is claiming longevity record of the world.

It is best to be satisfied with your lot, when it might have been a lot more.

The arguments of the inquisious individual are mostly sound.

Developing Rust Resistant Wheat

Dominion Cerealist Says Goal Will Be Reached Very Soon

Within three years Western Canada should have a rust resistant wheat which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion Cerealist, recently.

Mr. Newman is spending a month or more in the west, inspecting the work of the Dominion Rust Research Laboratory at the Manitoba Agricultural College, and the various Dominion experimental farms in the west. He will also visit farms where rust resistant grains are being produced for experimental purposes.

The Ottawa official announced that the work at the research laboratory at Winnipeg would be extended within a year. An expert entomologist, Miss Hollinghead, formerly of Saskatoon, and now at Berkeley College, Calif., has been added to the staff, he said, and will assume her new duties next spring.

The appointment, Mr. Newman said, is the first of its kind in Canada, marking a distinct advance in the fighting of pure scientific research with the practical purposes of agriculture.

Another phase of cereal work which is engaging the attention of the department is the raising and marketing of high grade mulling barley. "We have found that a variety of barley grown in Manitoba, corresponds closely with the barley raised by the old country brewers in California," Mr. Newman said. "Prof. S. C. Grant, of the Manitoba Agricultural College, is studying the matter, and the heads of mulling farms there on the marketing of barley."

Explanations Are Logical

Expression "Odds and Ends" Goes Back To Time Of Shakespeare

Many words in the English language, as "odds and ends," have been found in the works of Shakespeare and Ben Jonson, in exactly this sense.

Curious that we should say "odds and ends" to a number of miscellaneous objects or details. And for the derivation of this colloquialism that has lasted for centuries, the phrase "odds and ends" have two interesting explanations.

"Odds," it is authoritatively stated in the Oxford Dictionary, is the obsolete English word "orta," which meant fragments. This word "orta" occurs frequently in the works of Shakespeare and Ben Jonson, in exactly this sense.

The other explanation is that the expression "odds and ends" comes from the old Saxon phrase "orda and ends." "Orda" was the Saxon word for beginning; so that in the old Saxon language, the phrase "orda and ends" really meant literally "beginnings and ends."

Both explanations seem logical and the probability is that they are both right and that the words "orta," is derived from the Saxon "orda," subsequently becoming "odds."

To Complete Study Of Arctic Flora

Dr. M. O. Mahe, geologist of the Geological Survey of Canada, is carrying on investigations in the regions around Hudson Bay and the Hudson Strait. He will collect botanical material and study northern plants in preparation for a comprehensive work on the flora of Arctic Canada.

Mahe visited posts in the Arctic archipelago with last year's Canadian Government expedition and this summer's investigations are intended to confirm observations made in 1927.

A Student From China

Announcement is made by the Mount Allison University that a distance will be established by one scholar who will attend this fall. This student is China Chien Poo, a graduate of Pui Ying Middle School in Canton, China, who is registered in the normal matriculation class. His studies in this country are to complete his University course in Canada.

CHAPTER XXX.—Continued

Only desperate men would ever have dreamed of such a trick as this. The camp was fenced with eight strands of barbed wire, and every six inches carried an arrow point. But with the aid of a die which one of the men possessed, they would cut the two lower strands, at dusk, just before the lamps were lighted, and crawl through. At the last moment the other two men grew panic-stricken. "It is safe—death!" said Jack. "they'll catch us. I can see how they are watching us. I'd go, and take a chance only I have a wife and kid. I've got to think of them."

"The other man declared the plan a foolish one on account of the weather. 'January in Germany is too much like the corner of Portage and Main,' he said."

A new batch of prisoners had come in that day, and one of them, who was standing near Jack and asked if he might go. He was a grizzled man of about thirty-five.

"I have no one depending on me," he said, "and I have already tried twice."

"Come along—sure," said Jack, "three times and out."

"Thank you so much," said the man heartily.

Jack was startled by his politeness. A prison camp does not always foster the social amenities.

"Your name is Doran, is it not?" asked his new friend.

"Mine is English—at least, that is my nickname. We are both from Canada."

"We might as well try

What Will
you
do

When your
Children Cry
for It

There is hardly a household that hasn't heard of Castoria. At least every mother knows its name, and every child is there in your family. There's almost daily need of its comfort. And any night, any day, you're thankful there's a bottle in the house. Just a few drops, and you're all right. Colic, or constipation, or colic, or diarrhoea checked. A vegetable purgative is a baby remedy meant for you. For children. Castoria is the only thing you have ever heard of, and it's giving to infants. Stronger ingredients are dangerous to a little baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready. Always safe to use, in emergencies. For everyday ailments. Any hour of the day or night that baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

**Fletcher's
CASTORIA**

MADE IN U.S.A.

bodily into a garden as they came through a village. He had a way of quieting the dogs by a peculiar whistle and this gave him a distinct advantage. The dogs who came out barking fiercely, changed their attitude when he spoke to them, and even showed a disposition to follow him.

"If the dogs could bring us food we would have plenty," he said that day, as they sat in the spruce thicket. "The chances are against us, Jack, but one of us may get out."

"One of us!" exclaimed Jack, "it must be both or none!"

"Did you see the other," it does not matter much about me. No one cares so very much, and it happens that the one person who cares a little bit about me, cares very much about you."

Jack looked at his companion—dishevelled, dirty, long-haired and long-whiskered, his eyes bloodshot—and wondered if his mind were going.

"And who is that?" he asked gently. "Is it he would humor his poor friend's mood."

"Your wife, Heiml."

"Heiml," Jack repeated. "My wife?"

"Yes, yours—she is the only woman except my mother who ever cared whether I lived or died."

Then he told Jack of his quarrel with Larsen in Eagle Mines, and of Heiml's kindness, and of the week he had stayed in her house.

"She asked me to pray for you, Jack," he concluded, "and I kissed her golden hair. She told me she was sure you would go to the war, and asked me if I met you would I say your friend, that is why I came—it was Heiml's wish."

"She asked me to pray for you, Jack," he concluded, "and I kissed her golden hair. She told me she was sure you would go to the war, and asked me if I met you would I say your friend, that is why I came—it was Heiml's wish."

THE SIX YEAR MOLAR

You have heard your dentist call the first tooth with the "six year molar."

Why is this? You have perhaps guessed it—that it is because erupts usually at about the sixth year.

Now, you have been observing enough to note that it is a first tooth in the sense that no tooth was to take room for it.

And coming in at this early age, you may have thought it a "baby tooth" which would in due time be shed.

So, in your child, you have perhaps neglected to give it the care that it deserved—with disastrous results.

Without doubt, this neglect is the most common of dental sins committed by parents, and perhaps with grave consequences to their children.

Because, should this tooth become badly decayed within four or five years following its eruption as is the case with the "six year molar" in a real sense, this six year molar is the "key" to the dental arch.

However, Nature is gracious, for this tooth has lost its place in the dental arch, and is shed.

But this has been lost at an early age, the second molar has "drifted" forward to fill the space with the third molar advancing in turn as the second molar is shed.

But this is only rarely the case—better a little care at the proper time to prevent this trouble rather than to rely on Nature for a cure.

Co-Operative Wool Growers

Shipments Already 30,000 Pounds Over That of Last Year

With the shipment of 12 carloads of domestic wool from Regina, recently, the Canadian Co-operative Wool Growers Association is already 90,000 pounds over last year in its shipments from Saskatchewan and Manitoba, according to W. Thompson, manager, at Regina.

Mr. Thompson said two more carloads would complete the season's work, and he anticipated that in the next two months the 1926 shipment would show a total increase of about 100,000 pounds over the 1925.

A substantial increase also has been shown in the range wool shipped from Maple-Creek.

The Many-Purpose Oil.—Both in the house and stable, there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and relieves sore throat and chest. Horses are liable very largely to similar ailments and multiple as apply mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

"I notice that the horsemen are being picked on the mosquito and good deal lately," writes J.R.M. "But I can assure them that the mosquito has a very good point. It's a disgusting bug, but he'll give you a bite and a swell time afterwards."

Political Spectator: "Are you finding the campaign interesting?"

Would-be M.P.: "Well, I am certainly learning a lot about my past I never knew before."

Epaph: "But has any self-confident man ever been elected?"

Pearl: "He must have. Dad. He opened a checking account with borrowed money."

According to a recent announcement, Tokyo, Japan, has nearly 6,000 confectionaries and bakeries, and only about 1,000 meat markets.

The kind of person Barnum said was born every minute is now born twice a minute.

Minard's Liment—The Universal Remedy.

Granted Temporary Parole

Two Negroes Sentenced to Death May Escape Penalty

Governor Graves, of Birmingham, Ala., granted a temporary parole of 60 days to two negroes convicted of murdering a negro who later returned to her home after several months' absence on a visit to relatives. The two men were charged with chopping the woman's body in pieces and throwing them into the Alabama River. The parole was granted pending an official investigation.

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous Sleepless Children

From Canada's fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant-tasting little tablets that so gently relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, ME. "My little girl was nervous and could not sleep. I tried the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house, for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box. The Dr. Williams' Medicine Co., Brockville, Ont.

Export Trade With Germany

Canada's export trade with Germany will be greatly increased under the new trade agreements which the Dominion is now endeavoring to establish with that country, according to Mr. B. Palmer, minister of External Affairs, Canadian Trade Commissioner at Hamburg.

Contract For Plane Hangar

The defence department is going to construct a large hangar for airplanes at the Rockcliffe Airplane Plant, Ottawa, and the contract has been secured by MacDonald Brothers, Ottawa, the amount being in the vicinity of \$53,000, it was announced.

Let Minard's Liment Relieve Pain

Canada has given 57,000,000 acres of land to railway companies in the Northwest.

Canada is 18 times as large as France, 20 times as large as Spain.

Hughes Simpson is the barber at the Veterans Club, while John Stoult, proprietor of the Calgary Auto Laundry is doing the best job in town slicking up the city autos.

Okanagan Fruit Growers In Unequal Position

Orchardists in the Okanagan Valley are endeavoring to secure reduction of transportation

costs, and re-enforcement of dumping duties, temporary suspension of which has occurred through a constitutional difficulty. If transportation rates were equal, they assert that the Okanagan would still have a transportation problem, because of its isolated position. This matter of transportation and the dumping of surplus fruit produce from the U.S. is making things very serious for the progress of the fruit growing industry in the Okanagan, they claim.

Officials of the Ass. Growers declare that fruit shipped from Ontario to Moose Jaw is on equal terms as to freightage costs as fruits shipped from the Okanagan. The Ontario shipper enjoying a 30 pc. advantage in transportation rates: this they claim is the greatest injustice they suffer, and one of the chief bars to the profitable marketing of their produce.

Daddy Was Not Insured

Daddy, if you know we're hungry, Know that we are poor, It must break your heart in Heaven, 'Cause you never did insure, Momma wonders why you didn't, Save the dimes you throw away, But you felt too strong and healthy For insurance, people say.
